

Caustic Soda

Sodium Hydroxide (Na OH)

Product Description

Sodium Hydroxide is the principal strong based used in the chemical industry. In bulk, it is most often handled as an aqueous solution, since solution are cheaper and easier to handle. It is use to drive for chemical reaction and also for neutralization of acidic materials. It can be used also as a neutralizing agent in petroleum refining.

Typical Data

Property	Unit	Value	Test Method
NaOH	WT%	49-51	Uhde A59.01.04
NaCl	WT%	0.01 Max	Uhde A59.02.01
Na ₂ SO ₄	ppm by wt	40 Max	Uhde A59.01.04
Fe	ppm by wt	3 Max	Uhde A59.09.01
SiO ₂	--	--	Uhde A59.06.01
Sp.Gr@15.6°C	--	1.515 Min	Uhde A59.01.03
Appearance	--	Clear	Visual
Na ClO ₃	ppm by wt	50 Max	Uhde A59.10.02
